www.thesimguy.com

With over 15 years experience, primarily in the defense simulation community, my work has focused on the practical applications of concurrency to enhance simulation-based analysis and training.

Personal

Nationality U.S.
Clearances DoD Secret
Fields of Interest Discrete event simulation, parallel and distributed systems

Education

1994 **Ph.D.**, Virginia Tech, Computer Science.
1990 **M.S.**, Virginia Tech, Computer Science.
1988 **B.S.**, Virginia Tech, Computer Science.

Employment History

Industry

2004–present **The MITRE Corporation, McLean, VA (Simulation and Modeling Engineer)**

Management roles:

- *Chief Engineer for Technology, J840. (10/13–present)*
Responsible for development and execution of division capability development and research strategies, technical material review and release policies, and laboratory investments.
- *Investment Area Lead for M&S, MITRE Innovation Program. (10-13–present)*
Responsible for developing and administering MITRE core M&S research portfolio.
- *Core Competency Lead for M&S, E500. (10/10–9/13)*
Responsible for developing and maintaining M&S technology surveys, outlook and strategy.
- *Technology Integrator, W800. (10/04–10/08)*
Managed division participation within MITRE Innovation Program (MIP).

Principal Investigator and Project Leader roles:

- *Advanced Manufacturing Strategy. (02/12–06/13)*
Conducted broad survey of US and international initiatives in advanced manufacturing. Developed roadmap for MITRE engagement in the areas of: synthetic biology and biotechnology; nanotechnology; photonics; robotics; modeling, analysis and optimization; systems engineering; and supply chain risk assessment. Sponsor: MITRE IR&D. Related publications: [58].
- *Fast-Time Architectures for NextGen Modeling and Simulation. (10/09–09/11)*
Developed grid computing frameworks to support simulation-based optimization methodologies for National Airspace System (NAS) models. Sponsor: MITRE IR&D. Related publications: [18].

- *Mobile Network Modeling Institute. (7/09–04/11)*
Investigated High Performance Computing (HPC) simulation frameworks to support representation of very large (e.g., million-node) mobile ad hoc wireless networks. Sponsor: Army Research Lab. Related publications: [19].
- *High Throughput Computing Clouds to Support Simulation as a Service. (10/08–10/09)*
Developed techniques to facilitate low-latency user interactivity with mobile Semi-Automated Forces (SAF) components within a cloud computing architecture. Sponsor: MITRE IR&D.
- *Pandemic Influenza Study. (12/05–9/07)*
Led the design and development of a federation of models to study the impact of pandemic flu on national telecommunications networks in the presence of widespread telecommuting. Sponsor: Department of Homeland Security (DHS) National Communications System. Related publications: [60].
- *High Performance, High Accuracy Electromagnetic Wave Propagation Modeling for Urban Environments. (1/97–6/97)*
Integrated support for the Transmission Line Matrix (TLM) methodology into the Rensselaer Optimistic Simulation System (ROSS). Demonstrated ability to represent $O(10^6)$ mobile wireless radios in complex terrain. Sponsor: MITRE IR&D. Related publications: [22, 23, 24, 61].
- *U.S. Border Patrol Three-Tier Model and Study. (10/04–7/05)*
Designed architecture for diverse applications of Border Patrol modeling and simulation based on OneSAF product line architecture concepts. Led design and development of a federation of MANA simulations to study technology, tactical infrastructure and agent trades at a Sector scale. Sponsor: Department Homeland Security. Related publications: [25].
- *Java Meets Simulation. (1/04–9/04)*
Contributed to the development of the Tortuga simulation framework (Principal Investigator: Richard Weatherly). Source is available on code.google.com/p/tortugades. Developed performance benchmarks for Tortuga, and implemented $O(1)$ priority queues. Sponsor: MITRE IR&D. Related publications: [26, 27].

2001–2004 **Abstraction and Associates, Reston, VA (President)**

Provided consulting and simulation engineering services to U.S. Army.

- *Lead Scientist for the U.S. Army RDECOM MATREX. (1/03–1/04)*
Supported the Chief Architect in the development of the MATREX architecture. Led performance studies of major architecture components.
- *Technical Advisor to the U.S. Army Model and Simulation Office (AMSO). (6/00–12/03)*
Provided technical guidance to the Director, AMSO, with respect to the development of Army model management policies and programs. Duties included: programmatic support to major Army simulation systems, including WARSIM, OneSAF, Joint Virtual Battlespace and the RDEC federation; defining the systems architecture concepts for the Simulation and Modeling for Acquisition, Requirements and Training (SMART) initiative; leading efforts to formulate and document Grand Challenges for M&S; and supporting efforts to document M&S best practices. Related publications: [2, 3, 17, 30, 31, 53, 62].

1995–2001 **The MITRE Corporation, McLean, VA (Simulation and Modeling Engineer)**

Management roles:

- *Technology Area Team Lead for M&S. (10/98–9/01)*
Represented WC3 on the M&S TAT within MITRE Technology Program (MTP). Developed annual M&S technology assessments and presented to MITRE CTO and Engineering Council.

Principal Investigator and Project Leader roles:

- *OneSAF Architecture Specification and Analysis*. (1/98–9/99)
Conducted pre-RFP analysis and specification of system objectives. MITRE's role also involved coordination of related OneSAF R&D undertaken at SAIC, Lockheed Martin and within the Defence Evaluation and Research Agency (DERA) in the UK. Sponsor: U.S. Army. Related publications: [7].
- *Theory and Practice in User-Composable Simulation Systems*. (10/98–9/99)
Characterized the fundamental aspects and limitations of composability as a system design principle based on computability and complexity theory. Sponsor: DARPA. Related publications: [5, 28, 32].
- *Web-Based Simulation Support*. (10/96–12/98)
Evaluated emerging web-based technologies for their use as distributed simulation infrastructure. Sponsor: MITRE IR&D. Related publications [4, 8, 34, 35, 37, 39, 40, 54, 55].
- *Aggregate Level Simulation Protocol (ALSP) Joint Training Confederation (JTC)*. (2/95–6/98)
Provided support in Systems Engineer role to the ALSP JTC. Comprised of up to 12 Service and Joint simulation systems, the JTC was employed to support several large-scale Command-Post Exercises (CPXs) annually, in the United States, Europe and Asia. Activities in support of the ALSP project included: review and evaluation of JTC functional evolution designs, generation and review of JTC test plans, JTC test coordination and reporting, VV&A process development and execution, protocol maintenance and evolution, model specification maintenance and evolution, and exercise support. Sponsor: U.S. Army. Related publications: [12, 38, 41, 42, 43, 45, 46, 56, 63, 64, 65, 66].

Academia

- 2011 **University of Virginia, Charlottesville, VA (Research Faculty)**
Served in the Department of Systems and Information Engineering to support UVA's participation within the Commonwealth Center for Advanced Manufacturing (CCAM). (4/11–4/12)
- 2000 **Northern Virginia Community College, Sterling, VA (Adjunct Faculty)**
Courses taught: IST 100 – *Introduction to Information Systems*; IST 276 – *Event-Driven Basic II*. (1/00–5/00)
- 1993 **Radford University, Radford, VA (Instructor)**
Courses taught: CS 109 – *Problem Solving and Programming*; CS 122 – *Discrete Mathematics for Computer Science*. (8/93–12/93)
- 1988–1994 **Virginia Tech Systems Research Center, Blacksburg, VA (Graduate Research Assistant)**
Supported numerous simulation projects/studies and served as computer systems administrator for SRC computing facilities. (5/88–11/94)

Professional Recognition and Service

- Honors and Awards Association for Computing Machinery (ACM), Service Award, 1997, 2003
MITRE, Directors Award, 1997, 2007
Upsilon Pi Epsilon, Honor Society in the Computing Sciences, inducted 1990
- Elected Office Association for Computing Machinery (ACM) Special Interest Group on Simulation (SIGSIM)
 - Chair, 1999–2001
 - Vice Chair, 1997–1999
 - Secretary/Treasurer, 1995–1997Society for Computer Simulation International (SCS), Director at Large, 2002–2003
- Appointments Association for Computing Machinery (ACM) Special Interest Group on Simulation (SIGSIM)
 - Advisory Board, 2008–present

Conference and Workshop Organization

- Board of Directors Winter Simulation Conference (2001-2012)
- Conference Chairmanship Program Co-Chair, 2004 Workshop on Parallel and Distributed Simulation, Kufstein, Austria, 16-19 May 2004.
Program Organizer, Dagstuhl Seminar on Grand Challenges for Modeling and Simulation, August 2002.
Program Chairman, First International Conference on Grand Challenges for Modeling and Simulation, San Antonio, TX, 27-31 January 2002.
Program Chairman, 1999 SCS International Conference on Web-Based Modeling and Simulation, San Francisco, CA, 17-20 January 1999.
- Program Committee Agent-Directed Simulation, 2005-2007
AI, Simulation and Planning Conference, 2000, 2002, 2004.
AsiaSim, 2013.
Conference on Enabling Technology for Simulation Science, 1998.
European Simulation Multiconference, 1999.
International Conference on Human-Computer Interface Advances for Modeling and Simulation, 2005.
International Conference on Web-Based Modeling and Simulation, 1998, 2000, 2001.
SIMULTECH, 2012,2013.
Workshop on Parallel and Distributed Simulation, 2000, 2002-2006, 2009, 2012, 2013.
- Track Coordinator Simulation Interoperability Workshop (Testing Forum), 1997.
Winter Simulation Conference (Modeling Methodology: 2000; Military Applications: 1999,2006)

Invited Presentations

- Conference Keynotes Beyond Speedup Revisited: PADS, the HLA, Websim and the Cloud, Workshop on Modeling and Simulation on Grid and Cloud Computing, Ottawa, ON, Canada, 13-16 May 2012.
Beyond Speedup: PADS, the HLA and Web-Based Simulation, 13th Workshop on Parallel and Distributed Simulation, Atlanta, GA, 1-4 May 1999.
- Seminars Thoughts on Science and Military Simulation, given at the SimScience Workshop, National Defense University, Washington, DC, 4-6 June 2002.
The ALSP Joint Training Confederation – A Case Study of Federation Testing and VV&A, given to the Computer Science Graduate Colloquium, Old Dominion University, 21 November 1997.
Advanced Distributed Simulation through the Aggregate Level Simulation Protocol, given to the Virginia Tech Graduate Seminar, Department of Computer Science, 8 November 1995.
Simulation Model Specification: On the Role of Model Representation in the Model-Centered Sciences, given to the ORSA Computer Science Technical Session Conference, Williamsburg, VA, 5 January 1994.

Editorial Activities

- Advisory Board *Journal of Simulation*, 2005-present.
- Associate Editor *SCS Simulation*, 2001-present.
Journal of Defense Modeling and Simulation, 2003-present.
ACM Transactions on Modeling and Computer Simulation, 1999-2008.
IEEE Transactions on Systems, Man and Cybernetics, 2000-2001.
- Guest Editor *SCS Simulation*, Special Issue on Parallel and Distributed Simulation, 81(4), April 2005.

SCS Simulation, Special Issue on Grand Challenges for Modeling and Simulation, 80(9), (with W.H. Lunceford), September 2004.

Future Generation Computer Systems, Special Section: Best of WEBSIM 99, 17(5), (with A.G. Bruzzone and A. Uhrmacher), March 2001.

ACM Transactions on Modeling and Computer Simulation, Special Issue on Web-Based Modeling and Simulation, 10(1), January 2000.
